

Remote Learning is a strategy for learning continuity to be deployed for extended time away from school. During Remote Learning your student's learning can happen anywhere. Review the lesson with your child and decide on the support your child will need through instructional accommodations or accessibility tools.

**Instructional accommodations: Allows students to participate in activities and lessons to make learning and demonstrating knowledge accessible for all.**

- Preview lesson tasks/assignments
- Provide checklists for multi-step activities
- Break the task/assignment into parts
- Read directions/tasks aloud
- Repetition of directions
- Bold and highlight important text
- Provide a dictionary
- Review key vocabulary
- Ask students to look, touch and verbalize what they see and think
- Breaks from learning
- Extended time
- Check for understanding during task
- Visual Aids (picture, flashcards, etc.)
- Positive reinforcement
- Limit visual text to one page

**Accessibility Tools: Designed to make learning more accessible to students with a wide range of disabilities.**

**Communication with Special Education Case Manager:** Your child's case manager is available for questions or guidance with any of the instructional materials or troubleshooting any digital platforms.

**Assistive Technology Support:** If your child has an assistive technology device (e.g. Novachat) and you have questions regarding how to operate the device, you can call the assistive technology help line at 470-254-5205. An assistive technology specialist will be answering these calls and assisting parents with any questions specific to AT devices.
